6. (Currently amended) A camera system for outputting deblurred images, said system comprising:
a portable handheld camera device comprising an image sensor for sensing an image;
a velocity ~~detection means~~ detector for ~~determining~~ adapted to determine any motion of said image relative to an external environment and to produce a velocity output indicative thereof;
a processor ~~means~~ interconnected to said image sensor and said velocity ~~detection means~~ detector and processing said sensed image under programme control utilising the velocity output to deblur said image and to output said deblurred image and wherein said processor means is connected to an integral inkjet printer means internal to said portable handheld camera device for output of said deblurred image on print media.
- DI
7. (Currently amended) A camera system as claimed in claim 6 wherein said velocity ~~detection means~~ detector comprises an accelerometer.
8. (Previously amended) A camera system as claimed in claim 7 wherein said accelerometer comprises a micro-electro mechanical device.
